GL-3323 Non ESD Nylon half gloves
מקטים= 30205040\30205039\30205038 \ 30205037

Product description:

The Nylon glove is made of nylon and carbon fibre, and Polyurethane, its basic material composes of nylon and carbon fibre. It is with good elasticity and dissipative static electronic function. ESD Nylon glove can prevent products from being damaged by human static electronic. It applies for the worker must use ESD glove in semiconductor, photoelectric industry and etc.

Product property

Good ventilation.

Comfortable and durable.

Reusable.

Product application

nylon glove is widely use for electronic, optics , semiconductor, photoelectric industry.

Size and packing:

ESD nylon gloves series have S, M, L, XL :S(green edge), M(Orange edge), L(gray edge), XL. (Blueedge),

10pair.
