Product Information- SIMCO BENCH TOP IONIZER (match product)

Provides localized coverage with superior charge decay efficiency. The Aerostat PC is designed to provide ionization to a targeted work surface. It is distinguished by its variable speed control and patented emitter point cleaner and is an excellent choice for eliminating static in production processes. While helping to protect products and personnel from the effects of static discharge.

Features:

- Fast, targeted neutralization of static charges
- Lightweight, compact and quiet for unobtrusive use
- Built-in point cleaner simplifies maintenance
- Variable speed fan for airflow control
- Status lamp indicates high voltage is present at the emitter points
- Integrated heater for warm air flow if desired
- Enclose: Aluminum
- Finish: Acrylic Enamel

Size (W x H x D):	5½ x 85/8 x 3¼ in.
Weight:	5.3lb (2.4kg)
Air Volume Output:	35CFM – 70CFM (low – high)
Area Coverage:	1 x 5 ft.
Ion Balance (Offset Voltage):	0 ± 10V
Discharge Time*:	1.5 seconds
