Polystyrene Mat Frame

DESCRIPTION

Polystyrene Mat Frames can be used as base for Tacky Mats to eliminate attaching tacky mats directly unto floors. These frames can be used with colored mats and transparent mats. Customized prints maybe added into the frame especially when using transparent or clear mats.

FEATURES

• Prevent attachment of tacky mats directly unto the floor
• Frame mounting unto floor may be done by double-sided tape or by the use of Anti-slip Backing mat so mat
   can be used from one location to another without leaving adhesive residue on the floor
• Lightweight and with durable construction

APPLICATIONS

• Perfect for cleanrooms, laboratories, and any other dust or dirt-free environment where tacky mats are used
