

PRODUCT CATALOG

Model No. : HDP304L35RED

Product Name : Welding Gloves

Pic :

Descriptions : 35cm, Red, Material: Split Cow Leather

Details :

Material: Cowhide split leather

Length: 14 inch/35 cm

Specification:

5-finger welder's glove, heat-resistant leather, American cut, cowhide strengthening piece on palm, cotton lining on hand and cloth on cuff. Length: 35cm.

Instructions for use:

All-purpose protective glove for mechanical and thermal risks against flame.

Limits to use:

Do not use other than for the purpose defined in the instructions for use below. *Users are reminded that gloves with very high resistance to traction (level 4) should not be used when there is a risk of grabbing by moving machines. These gloves do not contain any substances known to be carcinogenic or toxic. Contact with the skin may cause allergic reactions in sensitive persons (natural latex, in the cuff wrists of some gloves). In the event of a reaction, cease use and consult a doctor. Before using these gloves, check that they are intact. Replace if necessary. When gloves are intended for arc welding: these gloves do not provide protection against electric shock caused by defective equipment or live working, and the electrical resistance is reduced if gloves are wet, dirty or soaked with sweat, this could increase the risk.

Instructions for storage:

Store in a cool, dry place away from frost and light in their original packaging.
